

Betatester for MyContacts wanted

Description

Hi folks! Yes, we are still around, the summer hole has closed and we have again more time for Flojo-Soft. Now, that MyContacts has reached a really usable state, we are looking for betatesters for it. In order to give anyone the chance to become a betatester, we are asking for ones which are not already betatesters for our other software, [MyBudget](#). This way we can also guarantee, that software doesn't look and behave like we and the betateam find it has to do.

If you are interested, please write an email to [info \[at\] flojo-soft \[dot\] com](mailto:info@flojo-soft.com). Have also a look to the screenshots we put online [here](#)!
