

MyContacts

Description

MyContacts is, like the name already says, an application to manage your contacts. In order to keep organized your contacts and have quickly acces to data from a certain person, MyContacts is the ideal tool for it.

Features that MyContacts offers:

- Support for a picture/photo of a contact
- Support for more than the standard attributes
- Search window to find quickly the desired contact
- Group window to browse contacts by groups
- Import/ export vCards
- Interface is highly configurable
- The content of a tab is completely configurable through the config file

MyContacts is now ready for distribution. See some screenshots [here](#).
