

MyContacts 1.0 released

Description

We are proud to announce the first version of our contact manager MyContacts. After the developing time and beta testing phase the software is now in a quite stable state, though, software is rarely bug free. Therefore we put the [bug tracker](#) online.

MyContacts is priced at 15,00 € and can be bought via Paypal. Also, 10% of the price will go to the [Haiku project](#) as thank for keeping BeOS alive.

Now, don't hesitate to visit the MyContacts page and read the features.
