

MyShoutcast available

Description

Hi to all, we offer you our first free application, MyShoutcast. As the name says, it has to do with [shoutcast](#). With this application you can search for radiostreams on the shoutcast-server.

Features

- * Search for song title, artist or genre
- * Launch directly the website of the streaming host
- * Store your favourites
- * Localized/ easy localizable (please send us additional files to info at flojo-soft com)

Note

Make sure you assigned the file type **audio/x-scpls** to an application (SoundPlay or MediaPlayer). We got best results using [SoundPlay](#) as player.

Download MyShoutcast on our [Download page](#).
